

Implant Placement Kit

Nursing staff at a number of hospitals have found it to be an efficient practice to prepare supply kits with items needed for bedside implant placement. A sufficient number of kits should remain stocked in a convenient location for easy access.

Preparing the kits and monitoring the supply is an assigned duty.

Kit Contents:

- ✓ 10cc syringe (3 or 5ml syringe also acceptable)
- ✓ 18 gauge draw needle
- ✓ 27 gauge, 1¼ cm needle
- ✓ Alcohol swab
- ✓ Betadine povidone-iodine or chlorhexidine skin prep
- ✓ Band-Aid
- ✓ Sterile 4x4 gauze
- ✓ Kerlix long gauze or wrap
